Nifty Feeding Cup is a reusable cup for feeding breast milk to newborns with breastfeeding difficulties.

Caution:
• Reprocess the cup before first use and with each new infant. Refer to Reprocessing Instructions.
• Do not use the cup to administer medication.

Express desired amount of breast milk in a clean Nifty cup. Gently squeeze the cup to fill the feeding reservoir. Ensure baby is in a semi-upright position with a supported head and neck. Bring the cup to baby's mouth. Do not pour the milk into the mouth. Allow baby to actively feed from the reservoir at her own pace.

Feeding reservoir

Nifty Feeding Cup has been developed and designed through a collaboration between the University of Washington, Seattle Children's Hospital, PATH and Laerdal Global Health.

Material: Silicone rubber
Volume: 5 to 40 ml
Mass: Approx. 17 g
Operating Temperature: 0 °C to 50 °C (32 °F to 122 °F)
Storage Temperature: -20 °C to 70 °C (-4 °F to 158 °F)

Laerdal Global Warranty
Refer to the Laerdal Global Warranty for terms and conditions. For more information visit www.laerdal.com

Reprocessing Instructions

STEP 1
1. Wash in a clean tray with clean water and mild soap.
2. Scrub the cup to remove milk and all other residue.
3. Rinse in clean water to remove soap residue.
4. Repeat above steps until clean.

STEP 2
Perform one of the listed methods:
a) Boiling
- Heat the cup to a boil. Let it stay at this temperature for 10 minutes.
- Rinse in clean water.

b) Steam Autoclaving
- Place the cup in a steam-autoclave.
- Autoclave at 121 °C (250 °F) for 20 minutes.
- Rinse in clean water.
c) Chlorine (0.5%)
- Immerse cup in a solution of 0.5% chlorine for 20 minutes.
- Rinse in clean water.

STEP 3
1. Allow the cup to air dry in a protected space.
2. Inspect for damage and cleanliness/mineral deposits.
3. If damaged, remove cup from use.
Refer to back side for detailed reprocessing instructions.
